AS A WOMAN SEES IT

By RHETA CHILDE DORR.

Beacon, N. Y., is a manufacturing town of 10,000 inhabitants, situated on the Hudson river about sixty miles above New York City. Beacon has a commission form of government, and one of the commissioners, the mayor, in fact, is a medical man. The high death rate of bables, therefore, disturbed the conscience of the commissioners. Last summer they embarked on a campaign to save the babies, and they succeeded so well that the death rate went down from twenty and thirty per cent to four per cent.

went down from twenty and thirty per cent to four per cent.

This is how they did it: They employed a municipal nurse, an unusually competent and responsible young woman, who had ont only had a good hospital training, but had done district nursing and understood the problems of the poor. It was early in July when Miss Beatrice Gosling knocked at the front door of the first tenement house in Beacon. Walking into the room, she found a Hungarian woman, who could not speak a word of English, holding in he; arms a very dirty little baby. The whole place was dirty and swarmed with files.

Without the wedges of language the municipal purse about the matter.

Without the medium of language the municipal nurse showed the mother how to prepare milk for the baby's bottle, how to wash and sterllize bottle and nipple, and afterward how to bathe the baby and keep it out of doors. Then she went on into the next tenement room, where she found an Italian baby tightly swaddled and crying at the top of its protesting young lungs. The nurse unwrapped the child and persuaded the mother that the legs of American babies were meant to kick with.

This was the beginning of a busy summer for the new city nurse. She visited at least once every home in Heacon where there was a baby, not omitting the homes of the well to do, for she knew that a college education does not necessarily fit a girl to take intelligent care of infants. Homes in the congepted districts were visited many times. It became known that the municipal nurse performed miracles in the way of reforming cross and sleep-less babies, and that she could be sent for when babies were taken ill. She

was not a charity visitor, but a city institution, like the mayor himself, so no one was too proud to welcome her.

The most economical thing any municipality could do would be to provide a municipal nurse for every 10,000 of population. The saving in life, as well as in money, would make such a plan pay heavy dividends in one represented.

considerably curtailed by the lack of labor for other than war inclustries; these countries have therefore increased their imports from the nearest available source which is the United kingdom."

est available source which is the United kingdom."

Tables are given showing that exports from New York to Norway, Sweden and Denmark, during the first thirteen months of the war increased \$84,226,866 over the same period a year before, while exports to Germany decreased \$84,918,081. In this connection a commerce report of the United States is quoted as saying that customs returns of the Scandinavian countries all show a smaller volume of imports from America since the war pegan. The memorandum continues:

European war has proved rather "Now if the customs of Norway, beneficial than otherwise to American Sweden and Denmark show that imbeneficial than otherwise to American trade and industry, while any suggestion that Groat Britain is attempting to use the military situation for the purpose of hampering American trade is utterly refuted by the actual facts and figures.

"Among the British products all articles show a decrease in the total quantity exported with the few unimportant exceptions of mait, rice, lard, coccanut oil and paim oil.

"Any increase in British exports of cotton and woolen goods to these of Scandinavian, countries and to the allies of Great Britain is largely due to the fact that the French and Belgian textille Industry districts are in German occupation while the output of the German industry itself is considerably curtailed by the lack of labor for other than war inclustries; the Scandinavian countries while the considerably curtailed by the lack of labor for other than war inclustries; the Scandinavian countries where rethe Scandinavian countries, were re shipped largely to Germany. The fact that the increase in shipments from New York to Norway, Sweden

The American Mechanic

Is Offered a Wonderful Opportunity in

The Christmas Money Club

The position this country occupies as one of the greatest manufacturing nations of the world is due not so much to its inventive genius or the readiness with which capital seeks investment in this attractive field, as to its vast army of INTELLIGENT, CAPABLE AND THRIFTY WORKMEN. Every red-blooded, clear-eyed man of money loves the noise and smoke and the whir of wheels of the great factory, with its seductive promises and assured problems. Every worthy mechanic loves the lathe and drill and automatic hammer, these products of mechanical genius, as they chisel and throb and pound, always obedient to his will-and which, through his skill and intelligence, convert the crude material into the finished product of commerce. In no other country is found the initiative and efficiency of the American mechanic, and nowhere else is as much accomplished in a given time. The American mechanic has a larger earning, and is better educated, housed and clothed than is the mechanic of any other country-he is self-respecting, loyal, thrifty, home-loving —a bulwark of strength and dependence for the na-

THE CHRISTMAS MONEY CLUB POINTS THE WAY

There is no class of our people to whom the Christmas Money Club should appeal with greater force than to those who labor in our shops and factories. No one should better understand the value of a dollar than the man who has carned it barearmed, by his labor and skill. He is ambitious to own his home—to save in the years of his greatest earning power so that the necessity for severe labor may be removed later on. It is not difficult to save even now when so much is justly said about the high cost of living if an easy, systematic plan is adopted.

STUDY THE CHRISTMAS MONEY CLUB

It is designed to create a better citizenship-to encourage men in the practice of thrift-to encourage them to SAVE now so they may HAVE in years to come. Membership in the Christmas Money Club will increase one's self respect and give that physical satisfaction which always comes from having money

JOIN THE CHRISTMAS MONEY CLUB You will get the money so easily that it will seem almost like finding it.

INTEREST at 4 per cent will be allowed on all Christmas Money Club accounts, providing payments are made when due.

Open for Members on and after Wednesday, December 15.

Call at the bank the opening week and avoid the rush for memberships later on. Empire National Bank CLARKSBURG, W. VA.
